

AYUSH JUNEJA

FULL STACK & MOBILE APP DEVELOPER

New Delhi | ayushjuneja999@gmail.com | 9811195362 | [Portfolio](#) | [Github](#) | [Linkdin](#)

Full Stack Developer with nearly 2 years of professional experience building scalable web and mobile applications, e-commerce platforms, and business-focused digital systems.. Experienced in end-to-end product development, backend architecture, admin systems, analytics, and operational workflows in fast-paced startup environments. Passionate about creating high-performance, user-centric solutions with a strong focus on scalability, reliability, and seamless user experience.

AREA OF EXPERTISE

Full Stack Development
Mobile App Development
E-Commerce Systems

Backend & API Development
Admin Dashboard Development
UI/UX & Responsive Design

System Design & Scalable Architecture
Analytics & Performance Optimization
Communication & Collaboration

TECH STACK

Frontend Development - React.js, Next.js, Vue.js, Nuxt.js, Tailwind CSS, Zustand, HTML5, CSS3, Responsive Web Design, UI/UX Design, Component Architecture

Backend Development - Node.js, Express.js, REST APIs, Authentication & Authorization, WebSockets, Backend Architecture, Event-Driven Systems, Cron Jobs, API Integrations

Database & Cloud - MongoDB, Firebase, SQL, Cloudinary, Real-Time Database Integration, Scalable Database Design

Mobile App Development -Flutter, Cross-Platform App Development, Firebase Integration, FlutterFlow

Automation & Workflow Systems - n8n, Bubble.io, Workflow Automation, Webhook Systems, AI Workflow Automation, Business Process Automation, No-Code/Low-Code Development

Programming Languages - JavaScript, TypeScript, Python, Java, C++, C

AI & Emerging Technologies - Prompt Engineering, Generative AI Applications, Conversational AI, LLM Integrations, AI Automation Systems, Human-Centered AI Design, AI-assisted Product Development

Data Science & Machine Learning - NumPy, Pandas, Matplotlib, Scikit-learn, Data Analysis, Data Visualization, Machine Learning Fundamentals

UI/UX & Product Design - Wireframing, Prototyping, Design Systems, Usability Testing, Information Architecture

System Design & Architecture - Scalable Architecture, API Design, Modular Systems, Performance Optimization, Real-Time Systems

Tools & Platforms - Git, GitHub, Postman, Vercel, Render, Netlify, VS Code

Development Practices - Agile Development, Problem Solving, Communication & Collaboration, Production System Development

PROFESSIONAL EXPERIENCE

Software Developer, MIRAY

Dec 2025 - Present

Managing end-to-end e-commerce platforms including frontend, backend, admin systems, analytics, fulfillment workflows, and operational automation. Built scalable business systems focused on performance, seamless user experience, and process optimization through modern technologies and integrations.

Software Developer, Street Style Store

Jan 2025 - Nov 2025

Worked on full-stack development, e-commerce features, and business-focused digital solutions. Contributed to UI/UX improvements, performance optimization, testing workflows, and scalable system enhancements in a fast-paced startup environment.

Software Developer, Breauk Enterprises

Sep 2024 - Dec 2024

Contributed to web and mobile application development with a focus on responsive UI, product optimization, and user experience improvements. Assisted in analytics-driven enhancements and collaborated on scalable frontend and backend workflows.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

2021 - 2025

Guru Gobind Singh Indraprastha University | Delhi, India

Senior Secondary Education (CBSE)

2019 - 2021

DAV Public School | Delhi, India

FEATURED PROJECTS

MIRAY— Full Stack E-Commerce Platform

Built and managed a scalable D2C e-commerce system with admin dashboards, analytics, refund workflows, and operational automation.

HireHead AI — AI Recruitment Platform

Developed an AI-powered interview and resume analysis platform using machine learning and NLP workflows.

Foton Power — Photography E-Commerce Platform

Developed a modern e-commerce platform with responsive UI, analytics integration, and scalable frontend architecture.

ACHIVEMENTS & CERTIFICATIONS

- Scored **91 Percentile in GATE 2025** and **93 Percentile in GATE 2026**, showcasing strong analytical and problem-solving skills in Computer Science.
- Achieved **2nd Position** in the Microsoft Azure powered “**GitHub Quiz & Crack the Code**” coding competition by solving programming and logical challenges under time constraints.
- Completed **Microsoft Career Essentials** in Software Development and **Google Digital Marketing & E-Commerce** certifications, strengthening expertise in software engineering, digital systems, and modern product workflows.
